

Data Analyst – Level I

BSI is looking for an energetic data analyst. This key position requires the professional to (1) analyze field data from our remote sensors, (2) maintain user interfaces for our remote monitoring field installations, (3) respond to customer inquiries and support the account management objectives of our sales force, and (4) use his or her expertise in evaluating information and helping our programmers to improve data processing.

The Data Analyst will work independently and assist engineers in the creation, maintenance, and future development of our products, databases, user interfaces, and sensor management/alarm systems. The candidate must be comfortable working in a fast-paced, highly collaborative environment.

Minimum qualifications include:

- Two year Associates Degree OR

- 1+ years of computer science or similar experience AND
- 1+ years of courses in college-level math

- All candidates must have familiarity with standard desktop computer applications

Other qualities that will make you a successful candidate:

- You are a self-motivated individual with a passion for innovation.
- You are a proactive problem solver with a strong work ethic.
- You are an energetic team player who takes your job seriously.
- You are comfortable in managing your own time without a lot of oversight.
- You can demonstrate outstanding interpersonal, verbal, and written communication skills.
