The Merlin™

UT Integration

The Merlin™ Datalogger is a stand-alone, autonomous, battery-powered data logger, specifically targeting ADMMCP and UT functions

Flexibility

Collect data and retrieve on your schedule. Useful in hard to reach locations and where remote monitoring isn't feasible.

Customizable

Programmable data capture intervals with multiple data types. Scheduled sleep and wake control to minimize power consumption.

MERLIN DATA LOGGER - A POWERFUL TOOL FOR CATCHING STRAY CURRENT AND CORROSION IN REMOTE AREAS

- Customizable intervals and data acquisition (UT, CP)
- Compatible with BSI's internal and external corrosion monitoring devices (Eagle Array™, Owl™, Smart Tank™ and more)
- Force mechanical wake function for walk-up data download and maintenance
- Swappable battery
- Data download by wireless or wired communications, depending on the option that is selected and specific needs or preferences
- Failover/fallback to SD card removal in the event of comms or board failure or damage. The SD card can be read like any external flash drive.
- Multiple casing options available
